# Dual-Band airMAX<sup>®</sup> ac Radio with Dedicated Wi-Fi Management

Model: B-DB-AC

airMAX ac Technology for 300+ Mbps Throughput at 5 GHz

Superior Processing by airMAX Engine with Custom IC

Plug and Play Integration with airMAX Antennas

## Overview

### **Installation Options**

1111

Ubiquiti Networks designed airMAX<sup>®</sup> ac radios for high performance and ease of installation. You have the freedom to deploy the Bullet<sup>™</sup> AC anywhere in the world, as it allows for a high degree of flexibility in configuring channel bandwidths (subject to local country regulations).

#### Zero-Variable Deployment

The Bullet AC eliminates the need to use RF cables and requires no special antenna or tools to install. No radio card / host board issues. No RF cable quality concerns. No mechanical stability concerns. No enclosure mounting requirements. With the Bullet AC, operators can just plug and go.

# Software airoS<sup>°</sup>8

airOS<sup>®</sup> 8 is the revolutionary operating system for Ubiquiti<sup>®</sup> airMAX ac products.

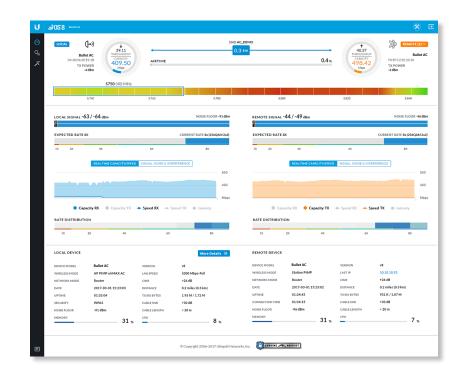

#### **Powerful Wireless Features**

- Access Point PtMP airMAX Mixed
   Mode
- airMAX ac Protocol Support
- Long-Range Point-to-Point (PtP) Link Mode
- Selectable Channel Width
  - PtP: 10/20/30/40/50/60/80 MHz
- PtMP: 10/20/30/40 MHz
- Automatic Channel Selection
- Transmit Power Control: Automatic/Manual
- Automatic Distance Selection (ACK Timing)
- Strongest WPA2 Security

#### **Usability Enhancements**

- airMagic<sup>®</sup> Channel Selection Tool
- Redesigned User Interface
- Dynamic Configuration Changes
- Instant Input Validation
- HTML5 Technology
- Optimization for Mobile Devices
- · Detailed Device Statistics
- Comprehensive Array of Diagnostic Tools, including RF Diagnostics and airView<sup>®</sup> Spectrum Analyzer

AC

#### **Advanced RF Analytics**

airMAX ac devices feature a multi-radio architecture to power a revolutionary RF analytics engine.

An independent processor on the PCBA powers a second, dedicated radio, which persistently analyzes the full 5 GHz spectrum and every received symbol to provide you with the most advanced RF analytics in the industry.

Data from the spectrum analysis and RF performance monitoring is displayed on the Dashboard and airView Spectrum Analyzer.

### **Real-Time Reporting**

airOS 8 displays the following RF information:

- Persistent RF Error Vector Magnitude (EVM) constellation diagrams
- Signal, Noise, and Interference (SNI) diagrams
- Carrier to Interference-plus-Noise Ratio (CINR) histograms

## **Spectral Analysis**

airView allows you to identify noise signatures and plan your networks to minimize noise interference. airView performs the following functions:

- Constantly monitors environmental noise
- Collects energy data points in real-time spectral views
- Helps optimize channel selection, network design, and wireless performance

airView runs in the background without disabling the wireless link, so there is no disruption to the network.

In airView, there are three spectral views, each of which represents different data.

- Waterfall Aggregate energy collected for each frequency
- Waveform Aggregate energy collected
- Ambient Noise Level Background noise energy shown as a function of frequency

airView provides powerful spectrum analyzer functionality, eliminating the need to rent or purchase additional equipment for conducting site surveys.

## Multi-Radio Architecture

## **Dedicated Spectral Analysis**

#### Features

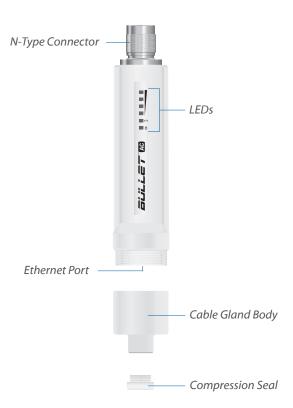

**Dual-Band Frequency** The Bullet AC covers both 2.4 and 5 GHz spectrums, covering a wide range of frequency bands that work well for both short and long-distance links.

**Passive Power over Ethernet (PoE)** 24V Passive PoE functionality is included. Both power and data are carried over a single Ethernet cable to the Bullet AC. Use the included PoE Adapter or an optional PoE switch.

**Output Power** The Bullet AC offers up to 22 dBm of output power.

**Weatherproof Design** The Bullet AC features a weatherproof design. Made from a high-grade, powder-coated aluminum, the casing can withstand nature's harshest outdoor elements.

#### **Hardware Overview**

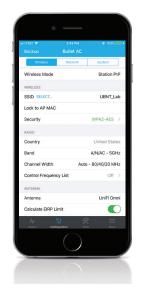

## **UNMS** App

The Bullet AC integrates a separate Wi-Fi radio for fast and easy setup using the Ubiquiti Network Management System (UNMS) app on your mobile device.

#### Accessing airOS via Wi-Fi

The UNMS<sup>™</sup> app provides instant accessibility to the airOS configuration interface and can be downloaded from the App Store (iOS) or Google Play<sup>™</sup> (Android). UNMS allows you to set up, configure, and manage your device, and offers various configuration options once you're connected or logged in.

#### **UNMS Configuration Screen**

# **Specifications**

Bullet AC						
Dimensions	190 x 46 mm (7.48 x 1.81")					
Weight	196 g (6.91 oz)					
Enclosure	Powder-Coated Aluminum					
Networking Interface	Gigabit Ethernet Port					
Antenna Connector	N-Type Connector					
LEDs	Power, Ethernet, (4) Signal Strength					
Throughput 2.4 GHz 5 GHz	160+ Mbps 300+ Mbps					
Max. Power Consumption	8W					
Output Power	22 dBm					
Power Supply	AC to 24VDC, 0.5A Gigabit PoE Adapter					
Power Method	24V Passive PoE (Pairs 4, 5+; 7, 8 Return)					
ESD/EMP Protection	± 24 kV Contact / Air					
Operating Temperature	-40 to 70° C (-40 to 158° F)					
Operating Humidity	5 to 95% Condensing					
Shock and Vibration	ETSI300-019-1.4					
Certifications	CE, FCC, IC
