

## EN User manual for Solight WM-14W-WIFI1 LED spotlight

Dear customer, thank you for purchasing our product. Please read the following instructions carefully and follow them to serve you safely and to your full satisfaction. This will prevent misuse or damage. Avoid unprofessional handling of this product and always observe the electrical appliance usage guidelines. Keep the instruction manual carefully. The light source of this luminaire is non-replaceable, at the end of its service life the entire luminaire must be replaced and disposed of in a designated place.

**Power:** AC 220 - 240V / 50Hz

- Always disconnect the power supply by turning off the switch or circuit breaker before starting to install the equipment, during maintenance or dismantling.
- The work involved in connecting the lamp to the power supply should be carried out by an authorised person with the appropriate licence.
- The lamp heats up during operation. Before any work is carried out on the lamp, e.g. maintenance etc., it is necessary to disconnect the lamp from the power supply and wait a few minutes until the lamp has cooled down completely.
- No use of the lamp without protective glass or with cracked protective glass.
- The luminaire must be connected to the electrical installation with a three-core lead (with protective conductor), which must be fed into the luminaire through a grommet.
- The connection must be made as shown in Figure 1.

L = phase = brown cable  
N = neutral wire = blue cable

Ground = green-yellow cable

- Before commissioning, it is absolutely necessary to check the correct connection.
- Before fixing the lamp it is necessary to check that the distances from surrounding objects are observed, the distance from the protective glass to the illuminated object must be at least 1 m, Fig. 2.
- Suitable for 9-12 mm diameter power cable.
- Finally, tighten all screws and adjust the lamp bracket to achieve the desired illumination.

SOLIGHT Holding, s.r.o. assumes no responsibility for damages caused by improper installation of the lamp, improper wiring for electrical installation, use of other than recommended accessories, unapproved technical changes, or failure to follow the recommendations in this manual!

### Smart Life app

**STEP 1** Search Google Play or the App Store for and install the Smart Life apps.

**STEP 2** Register a new account using your email or phone number and log in to the app

### STEP 3 Switch to pairing mode

In order to pair the LED strip with the Smart Life app, it needs to be put into pairing mode. This is indicated by the LED strip flashing and is activated by plugging and unplugging the LED spotlight 4 times in succession. After the fourth plugging in, you need to wait a few seconds and the strip will flash.

### STEP 4 Add a device

Launch the Smartlife app and tap the "+" button in the top right corner -> Lighting -> Lights (Wi-Fi). Then enter the login details of the wifi network your phone is currently connected to and tap "Next". On the next screen, confirm by tapping "Confirm the light is blinking rapidly;" that the button on the power adapter is blinking rapidly and then tap "Next". The pairing process takes a while. After successful pairing, the device will appear in the overview on the main screen of the app.

**STEP 4** Tap the device to control it.
